Subject Index

Volume 38

Acid
  amino
    hypercalciuria in total
    parenteral nutrition, 264
  protein in hepatic encephalopathy, 59
  bile, synthesis, total parenteral nutrition (rat), 95
  fatty
    chitosan and intestinal lipid
    absorption, 278
    coronary prevention program, 906
    uptake, diabetes mellitus (rat), 394
  folic
    ethanol ingestion, 64
    xanthine oxidase and heart disease, 327
  linolenic, prostaglandin synthesis, 895
  oxalic, spinach, mineral balances, 12
  phytic, starch digestibility and blood glucose response, 835
Acidophilus milk, irritable bowel syndrome, 257
Acrodermatitis enteropathica, zinc treatment, lipid metabolism, 512
Adiposity, obesity indices, similarities, 640
Adolescence
  acrodermatitis enteropathica, 512
  obesity, weight reduction, 20
Adolescents, pregnancy, maternal nutritional status, 739
Aerobic conditioning, cholesterol levels, 825
Agonist, adrenergic β-receptor, thermogenic and antiobesity activity (mouse, rat), 549
Alcohol, intake, body weight, diet, serum cholesterol (Zutphen Study), 591
Alcoholic liver disease, nutritional status, 849
Alcoholism
  acute, selenium, 713
  nutritional status, 469, 849
Alkaline phosphatase, sunlight, vitamin D status, and, 129
Aluminum, mineral metabolism (human), 411
American Board of Nutrition, certification of clinical nutrition specialists, 811
Amino acid
  hypercalciuria in total parenteral nutrition, 264
  protein in hepatic encephalopathy, 59
Amniotic fluid, vitamin A and retinol-binding fluid, 377
Anemia
  iron-deficiency, tumor killing capacity (mice), 238
  serum ferritin and erythrocyte, protoporphyrin, children, 71
Announcements, 159, 345, 492, 665, 822, 1025
Anorexia nervosa, muscle function and body composition, 229
Anthropometry
  graphical displays of growth data, 145
  growth and nutritional status of Bedouin infants, 747
  maternal, birth weight, 152
  maternal smoking and newborn body composition, 757
  muscle function and body composition in anorexia nervosa, 229
Antinatriuresis, sugars, blood pressure, and, 84
Asthenia, muscle symptoms in hemodialysis and L-carnitine, 523
Atherosclerosis, vitamin E dosing in renal patients, 253

Basal metabolism, energy expenditure in pregnancy, 369
Bile acid, synthesis, total parenteral nutrition (rat), 95
Binding proteins, vitamin B_{12} bioavailability from eggs, 436
Birth weight, maternal anthropometry, 152
Blood
  biochemical validation of dietary questionnaire, 631
  vitamin supplements and plasma levels, 559
Blood glucose response, phytic acid, starch digestibility, 835
Blood pressure
  dairy products, calcium and, 457
  dietary fat, 860
  sugars, antinatriuresis, and, 84
Body composition
  newborn, maternal smoking, 757
  renal dialysis patients, 52
  thermogenic and antiobesity activity of β-adrenoceptor agonist (mouse, rat), 549
  tissue loss during space flight, 667
  weight reduction in obese adolescents, 20
Body mass indices, commentary, 660
Body weight, diet, serum cholesterol and (Zutphen Study), 591
Bomb calorimetry, meals and body habitus, 32
Bone disease
  hypercalciuria in total parenteral nutrition, 264
  hyperparathyroid, uremia, 914
Book Reviews, 154, 342, 662, 819
Books Received, 157, 664
Bowel
  habits, dietary fiber from soybeans (human), 1
  irritable, syndrome, lactase deficiency, acidophilus milk, 257
  short, syndrome, jejunostomy losses, 270
Bran, dietary fiber and exocrine pancreas (dog), 843
Breast-feeding
  infant feeding patterns, nutrition survey, 133
  practices, variations, 152
Breast milk
  folacin concentration, lactating women, 929
  humoral defense factors, leprosy, 921
  intake, variations in breast-feeding practices, 152
  preterm, lipid composition, 300
  zinc status of postpartum women, 101

© 1983 American Society for Clinical Nutrition

Breath hydrogen, starch blockers, carbohydrate digestion and absorption, 498

Calcium
  dairy products, blood pressure and, 457
  mineral metabolism (human), 411
Cancer, Wilms' tumor, parenteral nutrition to reverse protein-energy malnutrition, 445
Carbohydrate
  absorption, starch blockers, 498
  diets, diabetes mellitus, 41
  digestion, starch blockers, 498
  starch digestibility and glycemic response, 481
Cardiovascular disease
  bovine milk xanthine oxidase, 327
  lipids and risk factors, 320
L-Carnitine
  hypertriglyceridemia, 532
  muscle symptoms and hemodialysis, 523
Carnitine, plasma levels, total parenteral nutrition, 339, 341
Carotene
  dietary questionnaire, biochemical validation, 631
  plasma levels, 559
Casein, plasma lipids (human), 245
Catecholamine metabolites, obesity, 356
Catecholamines
  energy metabolism, 1018
  plasma, tyrosine and tryptophan feeding, 429
Celiac disease, zinc absorption, 706
Children
  energy expenditure, 813, 815
  growth, graphical displays of data, 145
  nutritional status, continuous ambulatory peritoneal dialysis, 599
  phenylketonuria, phenylalanine intakes, 694
  preschool, linear growth, zinc supplement, 195
  serum ferritin and erythrocyte protoporphyrin, 71
  xerophthalmia, 139
Children (*see also* Infants)
Chitosan, intestinal lipid absorption, 278
Cholesterol
  balance, plasma lipids (human), 245
  chitosan and intestinal, lipid absorption, 278
  dietary, aerobic conditioning, 825
  fatty fish and plasma lipids, 349
  levels, cluster bean pods (rat), 295
  metabolism, total parenteral nutrition (rat), 95
  milk lipids of mothers of preterm infants, 300
  plasma
    glucose metabolism and, 489
    glucose tolerance, 817
  serum
    body weight, diet and (Zutphen Study), 591
    familial hypercholesterolemia, 285
Cholestyramine, intestinal lipid absorption, 278
Chromium
  supplementation, noninsulin-dependent diabetics, 404
  Turner's syndrome, 574
Chylomicrons, fatty meal test, 763
Circadian rhythm, catecholamine metabolites in obesity, 356
Cirrhosis, protein in hepatic encephalopathy, 59
Cluster bean pods, cholesterol levels (rat), 295
Cobalophilin, vitamin B_{12} binding by eggs, 436
Coffee, mineral source in diet, 936
Copper
  deficiency, fructose feeding (rat), 214
  transfusion, neonate, 701
Cyamopsis tetragonoloba, cluster bean pods and cholesterol levels (rat), 295

Dairy products, calcium, blood pressure and, 457
Dentistry, guide to materials for use in teaching clinical nutrition, 775
Dermatitis herpetiformis, zinc absorption, 706
Diabetes
  chromium in Turner's syndrome, 574
  noninsulin-dependent, chromium supplementation, 404
  starch digestibility and glycemic response, 481
Diabetes mellitus
  diet and nutrient absorption (rat), 394
  dietary treatment, 41
  insulin-dependent, dietary treatment, 41
Dialysis
  continuous ambulatory peritoneal, nutritional status of children, 599
  renal dysfunction, body composition, 52
Diet
  blood pressure and dietary fat, 860
  body weight, serum cholesterol and (Zutphen Study), 591
  diabetic, regulation of metabolic responses to legumes, 382
  legumes for hyperlipidemia, 567
  metabolizable energy, 954
  nutrient absorption, diabetes mellitus (rat), 394
  questionnaire, biochemical validation, 631
  restriction, obese adolescents, 20
  tea and coffee as mineral sources, 936
Dietary fat, blood pressure, 860
Dietary fiber
  chitosan and intestinal lipid absorption, 278
  cluster bean pods and cholesterol levels (rat), 295
  diabetic rats, 388
  diverticular disease, 115
  exocrine pancreas (dog), 843
  iron binding, 202
  locust bean gum in familial hypercholesterolemia, 285
  soybean (human), 1
  sucrose-induced insulin resistance (rat), 879
Dietary sodium, inventory method for quantitating, 474
Dietary surveys, fats, unknown types, 964
Dietary zinc, loss, sweat, 181
Diverticular disease, dietary fiber, 115
Down's syndrome, megavitamins and mental performance in retarded adults, 352

Education, nutrition, teaching, 775, 795
Eggs
  binding, vitamin B_{12}, 436
  consumption, plasma lipids, vegetarians, 612
Elderly
  dietary survey of retirement community, 122

vitamin D status, 335, 337, 338
Encephalopathy, hepatic, dietary protein, 59
Energy
balance, assessment and regulation (human), 972
expenditure
adults and children, 813, 815
doubly labeled water (human), 999
obesity, 680
pregnant women, 369
respiration chamber (human), 989
intake
econometric perspective, 978
physiological control, 978
inventory method for quantitating, 476
metabolism
sympathetic nervous system and catecholamines, 1018
thermogenic and antiobesity activity of β-adrenoceptor agonist (mouse, rat), 549
thyroid hormones and insulin, 1006
metabolizable, diet (human), 954
Enteropathy, gluten sensitive, zinc absorption in celiac disease and dermatitis herpetiformis, 706
Errata, 824
Erythrocyte protoporphyrin, serum ferritin, children, 71
Erythrocytes, zinc status of postpartum women, 101
Ethanol
folate metabolism, 64
selenium and acute alcoholism, 713
Exercise
cholesterol levels, 825
pyridoxal 5′-phosphate and vitamin B_6 in runners, 541
sucrose-induced insulin resistance (rat), 879
Exocrine pancreas, dietary fiber (dog), 843

Factor analysis, obesity indices, similarities, 640
Fat
dietary
blood pressure, 860
jejunostomy losses in short bowel syndrome, 270
polyunsaturated, blood pressure, 860
unknown type, dietary surveys, 964
Fatness, mortality, 313
Fatty acid
chitosan and intestinal lipid absorption, 278
coronary prevention program, 906
uptake, diabetes mellitus (rat), 394
Fatty meal test, alternative to stool fat analysis, 763
Ferritin, serum, erythrocyte protoporphyrin, children, 71
Fiber
crude, diverticular disease, 115
dietary
chitosan and intestinal lipid absorption, 278
cluster bean pods and cholesterol levels (rat), 295
diabetic rats, 388
diverticular disease, 115
exocrine pancreas (dog), 843
familial hypercholesterolemia, 285
iron binding, 202
soybean (human), 1
sucrose-induced insulin resistance (rat), 879
leguminous, regulation of metabolic responses, 382
soy polysaccharide, 504
spinach, mineral balances (human), 12
starch digestibility and glycemic response, 481
Fish, fatty, plasma lipids, 349
Fluoride, mineral metabolism (human), 411
Folacin, lactating women, 929
Folate
ethanol ingestion, 64
metabolism, ethanol, 64
Folic acid
ethanol ingestion, 64
xanthine oxidase and heart disease, 327
Fructose, feeding, copper deficiency (rat), 214

Glucose
metabolism
diabetic rats, 388
plasma cholesterol and, 489
tolerance
chromium supplementation in noninsulin-dependent diabetics, 404
plasma cholesterol, 817
soy polysaccharide, 504
uptake, diabetes mellitus (rat), 394
Glucose tolerance test
chromium in Turner's syndrome, 574
pyridoxine deficiency, 440
Glutathione peroxidase, selenium-dependent, selenium status of rural community, 620
Glutathione reductase, sickle cell disease, 884
Glycemic index, phytic acid, starch digestibility, blood glucose response, 835
Growth
infants, Bedouin, 747
linear, zinc supplement, 195
prenatal, maternal nutritional status and adolescent pregnancy, 739
Growth hormone, pyridoxine and glucose tolerance, 440
Guar gum, cluster bean pods and cholesterol levels (rat), 295

Heart disease, coronary prevention program, 906
Height, graphical displays of growth data, 145
Hematocrit, iron status of adolescent females, 109
Hemodialysis
body composition in renal dialysis patients, 52
L-carnitine, 532
muscle symptoms, 523
vitamin E dosing in renal patients, 253
Hemoglobin, iron status of adolescent females, 109
Hormone
growth, pyridoxine and glucose tolerance, 440
thyroid, energy metabolism, 1006
Human milk, zinc bioavailability, 420
Hypercalciuria, amino acid-induced, total parenteral nutrition, 264
Hypercholesterolemia, familial, locust bean gum, 285
Hyperlipidemia, legumes, dietary management, 567
Hypertriglyceridemia, L-carnitine treatment, 532

Immunity, prenatal zinc deprivation, 579
Infant formulas, zinc bioavailability, 420

Infants
Bedouin, nutritional status, 747
feeding patterns, nutrition survey, 133
growth, breast-feeding, 462
nutrient intake and relative weight, 730
nutrition, growth, breast-feeding, 462
preterm, maternal milk lipids, 300
Infants (*see also* Children)
Insulin
energy metabolism, 1006
pyridoxine and glucose tolerance, 440
resistance, sucrose-induced (rat), 879
response, chromium supplementation in noninsulin-dependent diabetes, 404
Iron
absorption (human), 333, 334
availability, dietary fiber, 202
binding, dietary fiber, 202
deficiency, 648
tumor killing capacity (mice), 238
fortification, update, 648
status, adolescent females, 109
Irritable bowel syndrome, lactase deficiency, irritable bowel syndrome, 257
Isotope
stable
energy expenditure from doubly labeled water, 999
selenium use in pregnancy, 169
zinc absorption, 187

Jejunostomy, output, short bowel syndrome, 270

Lactase
deficiency, 901
acidophilus milk, 257
Lactation
growth of breast-fed children, 462
infant feeding patterns, 133
pup response and maternal malnutrition (rat), 77
zinc status of postpartum women, 101
Lead, absorption (human), 333, 334
Legumes
hyperlipidemia, dietary management, 567
regulation of metabolic responses, 382
Lentils, regulation of metabolic responses, 382
Leprosy, humoral defense factors in breast milk, 921
Linolenic acid, prostaglandin synthesis, 895
Lipid
L-carnitine treatment on hypertriglyceridemia in hemodialysis, 532
emulsion, cholesterol and bile acid synthesis during total parenteral nutrition (rat), 95
metabolism, diabetic rats, 388
plasma
fatty fish, 349
legumes for hyperlipidemia, 567
risk factors, cardiovascular disease, 320
soy proteins, 245
vegetarians, egg consumption, 612
serum, chromium supplementation in noninsulin-dependent diabetics, 404
uptake, diabetes mellitus (rat), 394
Lipoprotein
acrodermatitis enteropathica, 512
fatty fish, 349
plasma lipids of vegetarians, egg consumption, 612
risk factors, cardiovascular disease, 320
vitamin E deficiency (owl monkey), 888
Liver
damage, nutritional status of alcoholics, 469
disease, alcoholism, nutritional status, 849
function, nasogastric feeding after head and neck surgery, 870
linolenic acid and prostaglandin synthesis, 895
Locust bean gum, familial hypercholesterolemia, 285
Lymphocytes, nutritional status in alcoholic liver disease, 849

Magnesium, mineral metabolism (human), 411
Malabsorption
fatty meal test, 763
jejunostomy losses in short bowel syndrome, 270
Malnutrition
maternal, reproductive cycle and nutritional status of pups (rat), 77
protein-energy, parenteral nutrition and Wilms' tumor, 445
Mass spectrometry, energy expenditure from doubly labeled water, 999
McCollum Award, 495
Meals, freely chosen, body habitus, 32
Medicine, guide to materials for use in teaching clinical nutrition, 775
Megavitamins, mental performance in retarded adults, 352
Menstrual cycle, nutrition, protein turnover, and physical activity, 223
Mental retardation, megavitamins, IQ, and vitamin B_6, 352
Milk
acidophilus, irritable bowel syndrome, 257
breast
folacin concentration, lactating women, 929
humoral defense factors, leprosy, 921
intake, variation in breast-feeding practices, 152
preterm, lipid composition, 300
zinc status of postpartum women, 101
homogenized bovine, heart disease, 327
human, zinc bioavailability, 420
Minerals
balances, spinach, 12
supplements, dietary survey of retirement community, 122
tea and coffee in diet, 936
Mortality, obesity, 313
Muscle
function, anorexia nervosa, 229
symptoms, hemodialysis and L-carnitine, 523

Nasogastric feeding, head and neck surgery, 870
Neonate, transfusion, serum zinc, and copper, 701
Nervous system, sympathetic, energy metabolism, 1018
Newborns, body composition, maternal smoking, 757
Nitrogen balance, nasogastric feeding after head and neck surgery, 870
Norepinephrine, plasma, tyrosine, tryptophan, plasma catecholamines and, 429
Nutrient intake, relative weight, 730

Nutrition
changing viewpoints, 148
clinical
competencies, 800
specialists, certification, 811
teaching, guide to materials, 775
competencies, 800
education, 775, 795, 800
peripheral, Wilms' tumor, 445
protein turnover, physical activity in women, 223
total parenteral
carnitine plasma levels, 339, 341
cholesterol and bile acid synthesis (rat), 95
hypercalciuria, 264
selenium deficiency, 769
Nutrition survey
infant feeding patterns, 133
retirement community, 122
Nutrition training programs, clinical, survey, 719
Nutritional status
alcoholic liver disease, 849
alcoholism, 469
body composition in renal dialysis patients, 52
children, continuous ambulatory peritoneal dialysis, 599
diabetes mellitus, 41
infants, Bedouin, 747
maternal, adolescent pregnancy, 739
pup response and maternal malnutrition (rat), 77

Obesity
adolescents, weight reduction, 20
catecholamine metabolites, 356
energy expenditure, 680
indices, similarities, 640
mortality, 313
nutrient intake and relative weight, 730
thermogenic activity of β-adrenoceptor agonist (mouse, rat), 549
Ontogeny, prenatal zinc deprivation, 579
Oral glucose tolerance test, dietary fiber in diabetic rats, 388
Oxalic acid, spinach, mineral balances, 12
Oxygen consumption, nasogastric feeding after head and neck surgery, 870

Pancreas, exocrine, dietary fiber (dog), 843
Parenteral feeding, jejunostomy losses in short bowel syndrome, 270
Parenteral nutrition
central, Wilms' tumor, 445
peripheral, Wilms' tumor, 445
total
carnitine plasma levels, 339, 341
cholesterol and bile acid synthesis (rat), 95
hypercalciuria, 264
selenium deficiency, 769
Phenylalanine, intakes, phenylketonuria, children, 694
Phenylketonuria, children, phenylalanine intakes, 694
Phosphorus, mineral metabolism (human), 411
Physical activity, nutrition, protein turnover in women, 223
Phytic acid, starch digestibility and blood glucose response, 835
Plasma
folacin, lactating women, 929
levels, vitamin supplements, 559
zinc status of postpartum women, 101
Plasma cholesterol
glucose
metabolism and, 489
tolerance, 817
Plasma lipids
legumes for hyperlipidemia, 567
vegetarians, egg consumption, 612
Polysaccharide, soy, gastrointestinal functions, nutrient balance, steroid excretions, glucose tolerance, serum lipids, 504
Potassium
counting, balance studies, 347
inventory method for quantitating, 474
losses, balance studies, 347
total body
anorexia nervosa, 229
body composition in renal dialysis patients, 52
tissue loss during space flight, 667
Pregnancy
adolescent, maternal nutritional status, 739
energy expenditure, 369
food intake and weight gain, 815, 816
selenium, 169
zinc concentration, 943
Prostaglandin, synthesis, linolenic acid, 895
Protein
animal and vegetable, hepatic encephalopathy, 59
binding, vitamin B_{12} bioavailability from eggs, 436
hypercalciuria in total parenteral nutrition, 264
retinol-binding, amniotic fluid, 377
soy, plasma lipids (human), 245
synthesis, women, 223
total body, body composition in renal dialysis patients, 52
Protein-energy malnutrition, parenteral nutrition and Wilms' tumor, 445
Protoporphyrin, erythrocyte, serum ferritin, children, 71
Public health, guide to materials for use in teaching clinical nutrition, 775
Pyridoxal 5′-phosphate, running, 541
Pyridoxine, deficiency, glucose tolerance, 440

Questionnaire, dietary, biochemical validation, 631
Quetelet index, meals and body habitus, 32

Radiation, ultraviolet, vitamin D metabolites, 129
Recommended dietary allowances, French population, 489
Red cells, packed, transfusion, serum zinc, and copper, neonate, 701
Respiration chamber, energy expenditure (human), 989
Retinol
-binding protein, amniotic fluid, 377
vitamin supplements and plasma levels, 559
Riboflavin
deficiency, glutathione reductase in sickle cell disease, 884
pup response and maternal malnutrition (rat), 77

Salt, metabolism, sugars, antinatriuresis, blood pressure, 85
Selenium
  alcoholism, 713
  deficiency, total parenteral nutrition, 769
  pregnancy, 169
  status, rural community, 620
Serum ferritin, erythrocyte protoporphyrin, children, 71
Short bowel syndrome, jejunostomy losses, 270
Sickle cell disease, glutathione reductase, 884
Smoking
  fatness and mortality, 313
  maternal, newborn body composition, 757
Sodium, dietary, inventory method for quantitating, 474
Soy
  polysaccharide, gastrointestinal functions, nutrient balance, steroid excretions, glucose tolerance, serum lipids, 504
  protein, plasma lipids (human), 245
Soybeans, dietary fiber (human), 1
Space flight, tissue loss, 667
Spectrometry, mass, energy expenditure in doubly labeled water, 999
Spinach, mineral balances (human), 12
Starch
  copper deficiency (rat), 214
  digestibility
    glycemic response, 481
    phytic acid, 835
  hydrolysis, regulation of metabolic responses to legumes, 382
Starch blockers, carbohydrate digestion and absorption, 498
Steatorrhea, fatty meal test, 763
Steroid
  excretion, soy polysaccharide, 504
  fecal, dietary fiber from soybeans (human), 1
Sucrose
  copper deficiency (rat), 214
  -induced insulin resistance (rat), 879
Sugars, antinatriuresis, blood pressure, and, 84
Sunlight, vitamin D status, and, 129
Sweat, zinc, losses, 181

Tea, mineral source in diet, 936
Thermogenesis, dietary-induced, obesity, 680
Thyroid hormones, energy metabolism, 1006
Tocopherol, vitamin supplements and plasma levels, 559
Trace elements, mineral metabolism (human), 411
Transferrin saturation, iron status of adolescent females, 109
Transit time, fecal, soy polysaccharide, 504
Triglyceride
  adipose tissue, coronary prevention program, 906
  fatty fish and plasma lipids, 349
  fatty meal test, 763
Tryptophan, feeding, plasma catecholamines, 429
Tumor, killing capacity, anemic mice, 238
Turner's syndrome, chromium, 574
Tyrosine
  catecholamine metabolites in obesity, 356
  feeding, plasma catecholamines, 429

Ultraviolet radiation, vitamin D metabolites, 129
Uremia
  nutritional status of children undergoing continuous ambulatory peritoneal dialysis, 599
  vitamin A and hyperparathyroid bone disease, 914

Vegetarians, egg consumption, plasma lipids, 612
Vitamin A
  amniotic fluid, 377
  hyperparathyroid bone disease in uremia, 914
  plasma levels, 559
  pup response and maternal malnutrition (rat), 77
Vitamin B_6
  dietary treatment of diabetes mellitus, 41
  mental performance in retarded adults, 352
  running, 541
Vitamin B_{12}, binding by eggs, 436
Vitamin D
  metabolites, sunlight, and, 129
  status, elderly Americans, 335, 337, 338
Vitamin E
  deficiency (owl monkey), 888
  dietary questionnaire, biochemical validation, 631
  dosing, renal patients, 253
  plasma levels, 559
Vitamins, supplements, dietary survey of retirement community, 122

Water, doubly labeled, energy expenditure, 999
Weight
  gain, food intake and pregnancy, 815, 816
  loss, energy expenditure, 680
  relative, nutrient intake and, 730
Weightlessness, tissue loss during space flight, 667
Wilms' tumor, parenteral nutrition to reverse protein-energy malnutrition, 445

Xanthine oxidase, milk, heart disease, 327
Xerophthalmia, children, 139

Zinc
  absorption, 187
    celiac disease and dermatitis herpetiformis, 706
    milk and infant formulas, 420
  acrodermatitis enteropathica, 512
  bioavailability, milk and infant formulas, 420
  deprivation, prenatal, 579
  dietary, loss, sweat, 181
  loss, sweat, 181
  pregnancy, 943
  status, postpartum women, 101
  supplement, linear growth, 195
  transfusion, neonate, 701
